

Around the World

Transport

Imagine you are planning a huge trip to all the different Elys across the world. What methods of transport would you use?

Think of different ways you could do your journey too - you could consider the;

- Quickest way to take your journey
- Slowest way to take your journey
- Most expensive or the cheapest way
- Most eco-friendly way

Route Planner

Plan your route below & remember to think about the distance, terrain and weather!

Design your own

If you could design the perfect method of transportation to help you visit each Ely around the world, what would it look like? What materials would you use and what features would it have?
Remember to think about what fuel or renewable energy it would use?
